

HW [18]: following the following steps, complete the table below.

They^{2F} are fast. The root for fast is (سَرِيْعٌ). The root is always 1M 3rd person.

Step 1: Use rule 230 to convert the noun into the appropriate form. For example, rule 230 will tell you how to convert the root (سَرِيْعٌ) into a duel female noun (سَرِيْعَتَانِ).

Step 2: Use Rule 610 to select the appropriate pronoun. For example, for a duel female third person, the pronoun (هُمَا) is found in row 12, column 3, i.e. (12,3).

Step 3: Check if we need Tanween on the noun using rule 250. For example, rule 250-3 tells you that no tanween on duel nouns.

Step 4: Check the Irab of the noun. According to rule 530, the Khabar is Marfoo[^]. In the example above, the word “fast” is Khabar, and Khabar is Marfoo[^].

Step 5: Then we go into table 280 to find out in (4,4) that the marfoo[^] for duel nouns has Alif not Ya’a, i.e. سَرِيْعَتَانِ not سَرِيْعَتَيْنِ.

Step 6: Assemble the words together to get a sentence. (هُمَا سَرِيْعَتَانِ).
